BATHROOM VANITY GUIDELINES

- Measure the walls in the bathroom
- Indicate where the plumbing is with measurements from the wall to the plumbing
- Measure from the wall to the toilet, if it is on the same wall as the vanity
- Bring a piece of the flooring
- Bring in paint samples

When you bring in your measurements we can help you decide how big a vanity you can have in the room. With the help of a piece of flooring, we can help you choose a colour for the vanity and the top.
