MAINTENANCE GUIDELINES

Wood

- Warm soapy water with a soft cloth or microfiber cloth
- No harsh chemicals
- No bleach

Thermoplastic

- Warm soapy water with a soft cloth or microfiber cloth
- HANDY HINT: Lay wax paper on top of the upper cabinets to collect air borne particles; this will make cleaning a breeze!

Laminate Countertops

- Hot soapy water when doing dishes
- Countertop Majic or Lysol wipes
- DO NOT USE BLEACH! It will strip the finish off the laminate over a period of time

Man-Made Marble Tops

- Just like a car, you need to protect the finish on your marble top. We recommend using “GEL GLOSS” liquid. It is a polisher/cleaner in one. Use every month to keep the water beading. Simply pour a small amount onto the surface, use a soft cloth to rub in. As you are rubbing it on to the marble it is cleaning the surface. Let it dry for 3-5 minutes then buff off with another soft cloth.
- HANDY HINT: Use Gel Gloss on your Acrylic or Fibreglass tubs and showers. It will prolong the life of the finish.
