## PAINTED CABINET DISCLAIMER

**Dear valued customer:** Please be advised that although we are committed to delivering high quality custom kitchens there are certain variables that are out of our control. When choosing a kitchen that is painted there are factors to consider. In order for us to have control over some of these variables we will be putting some restrictions on our products.

**Delivery:** Please allow at least an 8 to 10 week lead time for the delivery of the kitchen. We will require 1 to 2 weeks for product finishing.

**Door style:** You have the option of using a painted MDF or a natural wood product. Our recommendation is to use an MDF product as it suits our climate better. A natural wood product is prone to expand and contract leading to warping and cracking. Paint will crack and peel when wood swells and shrinks, these circumstances are beyond our control. We are not responsible for the relative humidity that may exist in our current climate, or in individual homes that will lead to these problems. Unless there is a manufacturer defect we will not replace doors under these circumstances.

**Colour Selection:** Our process involves a tinted lacquer that gives us the best possible finish. The colour choices you make must be made from the colour samples we have available. Any other colour selections made will not be guaranteed for colour matching. Final approval of the colour will be required prior to finishing.

**Discolouration:** Paint may discolour with exposure to ultra violet rays. By using a tinted lacquer we have made an attempt to limit this process, however it does not guarantee that discolouration will occur. We do not warrantee any discolouration due to exposure to natural light.
